While the 1980s output of Australia's oft misunderstood Severed Heads is well known, the 2000s were also an intensely creative period for the group. Along with a periodical magazine/album called *Op*, Severed Heads released limited hand-cut discs, two computer games and a handful of ultra-rare artworks. Medical Records is proud to present a new museum entitled *Clifford 2000*: a 180gm double album holding 18 years of music over four sides of continuous montage personally segued by Mr. Ellard himself.

Out December 8, 2020 on [Medical Records](#) .
